Collaboration:

Git, Jira, CI/CD with Docker

CSS & Styling:

CSS Modules, Sass, Material UI, Tailwind

Software Testing:

React-Testing Library, Cypress, Vitest

Web Tooling:

Vite, Rollup

WORK EXPERIENCE:

Raika – Frontend Developer

Tehran – July 2024 – Present

At Raika, I collaborate with a team of 16 members, focusing on building and enhancing our products software to deliver better experience. Key responsibilities and features delivered included:

- Developed a dashboard using React.js and Redux Toolkit from scratch to streamline product management and improve usability for stakeholders.
- Volunteered to use Next.js to develop a landing page for one of the company's key products, enhancing it for a better performance and SEO, which resulted in a 27% increase in sales.
- Developed an admin panel using React.js for managing user access, roles, and other settings across multiple dashboards, enhancing overall control and administration.
- Built a UI kit based on Material-UI and published it as a npm package for easy reuse. Also created a boilerplate to speed up project setup and keep things consistent.

Billimob – Frontend Developer

Tehran – July 2023 – July 2024

At Billimob, we focused on automating the billboard reservation process to improve efficiency. My contributions included:

- Developed a robust multi-role admin panel using React.js and Redux Toolkit to optimize billboard reservation, CRM, and financial management workflows, significantly improving operational efficiency and user control.
- Successfully designed, developed, and deployed a web-based live chat application using React.js and Socket.io, tailored for CRM systems to facilitate seamless, real-time communication with clients.

EDUCATION:

Bachelor's Degree in Chemical Engineering

Isfahan University of Technology

2018 – 2023

Languages:

English, Persian

Interests:

Playing team-oriented games, Creative

Problem-Solving, Cooking,

Reading books on Self-Improvement
